

Why I Believe That Any Vaccine That Uses Fetal Cell Lines from Abortions to Produce and Manufacture It Should Be Rejected

Rev. Ron Jones, The Titus Institute

I am opposed to taking any vaccine that uses fetal cell lines from abortions to produce and manufacture the vaccine. The Bible clearly teaches human beings are made in the image of God (Genesis 1:26) and thus human life is sacred. The Bible also teaches that human life begins at conception (Psalm 139:13-16). Therefore, any vaccine that uses fetal cell lines to produce and manufacture the vaccine I oppose. They are dependent upon the cells of murdered babies which I believe is forbidden by God.

As far as I could find out by my research (let me know if you know of others), this would apply to the following vaccines used in the U.S.:

Hepatitis A

Rabies (specifically the Imomax rabies vaccine)

Rubella (what the "R" stands for in the MMR vaccine)

Varicella (chickenpox)

Johnson and Johnson Covid19 vaccines

These vaccines are dependent for their existence on the fetal cells of aborted babies. They must be rejected.

However, the Pfizer and Moderna vaccines and many OTC and prescription drugs only use fetal cell lines for testing. These vaccines and medications are not dependent on these cells for their existence. Therefore, I do not reject them for that reason.

I reject the Pfizer and Moderna vaccines for a completely different reason. They interfere with the function of the human immune system. The Covid-19 vaccines are not like the traditional vaccines which insert into the human body a weakened form of the virus and activate the immune system to function as God created it to function. The "new technology" of the Covid-19 vaccines insert genetic code instructions into the cell to direct it to make spike proteins. This interferes with the function of the human immune system. God's intent was for the DNA within a person's body in a cell nucleus to give genetic code instructions not anything outside the cell. Therefore, this process is a violation of God's will for humanity. The Johnson and Johnson vaccine also does this so I reject it for both reasons above.
